ABOUT ME

I am a dynamic frontend engineer with a wide-ranging skill set and a proven ability to deliver impactful web solutions. I'm driven by a passion for using software development to solve real- world challenges and a relentless pursuit of quality. With strong attention to detail and a focus on staying current with industry advancements, I am dedicated to consistently delivering results that go beyond expectations. Thrives in fast-paced, mission-driven environments where code quality, innovation, and user experience matter.

EDUCATION

FEDERAL UNIVERSITY OF AGRICULTURE, ABEOKUTA, OGUN STATE. (FUNAAB)

November 2021 - May 2025

B.Sc. COMPUTER SCIENCE

EXPERIENCE

SOFTWARE / AI/ML ENGINEER — HYPA INTELLIGENCE ***Feb 2026 – Present***

- Designed, developed, and maintained multiple web and mobile applications across Hypa Intelligence's AI and African language technology ecosystem.
- Built and integrated AI-powered products leveraging **LLMs, translation, speech-to-text, text-to-speech, language understanding, and multilingual AI capabilities**.
- Contributed to the development, testing, evaluation, and deployment of AI models focused on **African and low-resource languages**.
- Worked with specialized and fine-tuned language models, integrating model inference APIs and AI services into production applications and developer tools.
- Developed software products around Hypa's AI capabilities, transforming research and trained models into practical, user-facing applications.
- Contributed to AI/ML workflows including **model experimentation, evaluation, inference, API integration, dataset handling, and output validation**.
- Built scalable frontend and cross-platform application architectures for rapidly evolving AI products, with a focus on performance, usability, and reliability.
- Collaborated with AI researchers, software engineers, and product teams to prototype, test, iterate, and deploy new AI-powered features and products.
- Worked across the product lifecycle, from **AI model integration and backend/API consumption to frontend, mobile application development, testing, and production deployment**.
- Contributed to the development of technology aimed at improving access to AI and language tools for **African languages and diverse linguistic communities**.

MOBILE & WEB DEVELOPER — TSES ***Contract***

- Designed, developed, and maintained enterprise-grade web and mobile applications across multiple products and client projects.
- Built complex SaaS platforms, business applications, dashboards, internal systems, and mobile applications from product requirements through implementation.
- Developed responsive and scalable user interfaces for enterprise, fintech, hospitality, education, workforce, logistics, and other business applications.
- Worked across multiple application codebases and product teams, adapting quickly to different architectures, requirements, and technology stacks.
- Integrated frontend applications with backend APIs, authentication systems, real-time services, third-party platforms, and business workflows.
- Built reusable components and application modules that accelerated development across multiple products and projects.
- Collaborated with designers, backend engineers, product teams, and other stakeholders to translate product requirements into production-ready software.
- Contributed to the development of software products deployed across enterprise and institutional environments.

DESKTOP APPLICATION ENGINEER — MOTION LABS ***January 2026- March 2026***

- Designed and developed desktop software applications for specialized operational and enterprise use cases.
- Built software solutions for the oil and gas industry, including applications supporting tracking, monitoring, data management, and operational workflows.
- Developed desktop interfaces and application logic for systems requiring reliable local processing, structured data handling, and integration with external services and devices.
- Worked on software solutions for security, investigation, and specialized operational environments.
- Designed reusable application components and implemented user-focused interfaces for complex technical workflows.
- Collaborated with technical and domain teams to translate operational requirements into functional desktop software.
- Tested, debugged, optimized, and maintained applications to improve reliability, usability, and overall system performance.

FRONTEND DEVELOPER – CENTRL ***May 2025 – August 2025***

- Collaborated with designers and engineers to develop a robust booking and event ticketing platform
- Wrote clean, maintainable frontend code using Nextjs
- Participated in code reviews and sprint planning discussions

FRONTEND DEVELOPER – APPLEGROVE ADVISORY ***March 2025 – June 2025***

- Designed and implemented responsive user interfaces for multi-role dashboards serving applicants, developers, communities, and mortgage institutions with role-based access controls and personalized workflows.
- Built interactive mortgage application forms and property listing components with real-time validation, progress tracking, and seamless API integration to enhance user experience across the application process.
- Developed secure file upload interfaces with drag-and-drop functionality for document submission, including progress indicators, file type validation, and encrypted transmission for sensitive applicant information.

- Optimized frontend performance through code splitting, lazy loading, and efficient state management to deliver fast-loading, responsive dashboards that handle complex data visualization and real-time updates across different user roles.

FRONTEND DEVELOPER – FIXERONI ***Dec. 2024 – March 2025***

- Collaborated with designers and engineers to develop an artisan booking platform:
- Wrote clean, maintainable frontend code using Next.js.
- Participated in code reviews and sprint planning discussions.

FRONTEND DEVELOPER – MOTHERLAND AI, Detroit USA ***June 2024 – February 2025***

- Created immersive language learning interfaces with gamified African language lessons featuring interactive pronunciation guides, cultural storytelling modules, and progress tracking systems that adapt to different African dialects and learning styles.
- Developed cross-platform mobile applications optimized for African markets with offline functionality, low-data consumption modes, and SMS integration to ensure accessibility across diverse connectivity conditions and device capabilities.
- Built community-driven content platforms where users can share cultural knowledge through audio stories, traditional music integration, video testimonials, and collaborative translation tools that help train and improve the AI model.
- Implemented AI-powered educational dashboards for schools and cultural institutions featuring lesson planning tools, student assessment interfaces, and cultural preservation archives that showcase African heritage through interactive multimedia experience

FRONTEND DEVELOPER – ATTITECH ***CONTRACT***

- Developed an interactive drawing board with dynamic tool selection, allowing users to draw and erase using a variety of tools (pen, brush, and eraser).
- Developed reusable components and connected frontend with backend services.
- Ensured a mobile-first responsive design for wide accessibility.
- Optimizing web applications for speed, accessibility, and cross-browser compatibility.

FRONTEND DEVELOPER – CRYPTOBROTHERS ***CONTRACT***

- Developed and maintained a crypto currency exchange platform for CryptoBrothers, enabling buying, selling, and exchanging various cryptocurrencies.
- Developed reusable components and connected frontend with backend services.
- Ensured a mobile-first responsive design for wide accessibility.
- Optimizing web applications for speed, accessibility, and cross-browser compatibility.

FRONTEND DEVELOPER INTERN – VCINT ***Dec. 2023 – August 2024***

- Converting high-fidelity UI designs into fully responsive and interactive web applications.
- Developed reusable components and connected frontend with backend services.
- Ensured a mobile-first responsive design for wide accessibility.
- Optimizing web applications for speed, accessibility, and cross-browser compatibility.

WEB DEVELOPMENT & CODING INSTRUCTOR – Petforde Technologies ***June 2024 – November 2024***

- Featured in so many bootcamp as a major web development tutor
- I was able to tutored kids within the age of 8-17 and made them productive website designs
- Successfully guided 15 students in building their own functional websites or interactive Scratch projects.
- Established a supportive learning environment where students felt confident to take risks and explore their creative

potential in coding.

TECH MENTOR & SOFTWARE DEVELOPMENT TUTOR – Microsoft ***May 2022 – June 2023***

- Mentored and guided young and inexperienced individuals in the tech industry, helping them identify and pursue suitable fields within the technology sector.
- Provided one-on-one and group tutoring sessions in software development, focusing on practical coding skills and real-world applications.
- Assisted mentees in developing foundational skills in various programming languages and technologies, fostering a deeper understanding of the tech landscape.
- Nominated to receive the Microsoft Innovative Educator Expert (MIEE) Award in recognition of contributions to educational excellence and innovation. (to be awarded 2025)

TOOLS & TECHNOLOGIES

- **Programming Languages:** JavaScript, TypeScript, Python, HTML, CSS
- **Frontend & Web:** React.js, Next.js, Tailwind CSS, Bootstrap, Chakra UI, Responsive Design
- **State Management & Data:** Redux Toolkit, Zustand, TanStack Query, REST APIs, WebSockets
- **Mobile Development:** React Native, Expo
- **AI / Machine Learning:** Large Language Models (LLMs), AI Model Integration, Model Inference, Prompt Engineering, Speech-to-Text, Text-to-Speech, Machine Translation, Hugging Face
- **Backend & APIs:** Node.js, API Integration, RESTful APIs, Authentication, Real-time Applications
- **Desktop Development:** Electron, Cross-platform Desktop Applications
- **Testing & Development Tools:** Jest, Cypress, Git, GitHub, CI/CD
- **DevOps & Infrastructure:** Docker, Kubernetes, Linux
- **Cloud & Deployment:** AWS, Azure, RunPod, Vercel
- **Databases:** PostgreSQL, MongoDB
- **Development Practices:** Agile/Scrum, Code Reviews, Component Architecture, Performance Optimization, Responsive Design
